A	Your Pet's Weight in *lbs.*	
B	Total *mg* of CBD in bottle (such as 500 *mg*)	
C	Total volume of CBD in bottle (such as 1) in oz.	
D	Total ml of CBD in bottle	*There are 30 ml of hemp oil per 1 oz. So, multiply the number on line C by the number on line D.*
E	Total Drops in bottle	*There are about 20 drops per ml on average. This number may change based upon your particular dropping skills. Multiply this number by the result calculated on line D*
F	Mg of CBD per Drop	*The strength of the CBD in the bottle (in mg) helps determine how many drops in one dose. Take the value on line B and divide it by the value on line E. This gives the total mg per drop.*
G	Total mg per dose	*Low dose: use .1* *Medium dose: use .3* *High dose: use .5* *Multiply this number by the pet weight on line A*
H	Total Drops in Dose	*Divide this number by the value on line F. This give the total Dose in Drops for your pet. This number may be rounded.*
